Subject: RE: Bay-Delta Plan Phase II Update Agencies Coordination Meeting - DO objective in Stockton DWSC

Hi Karen,

We are looking forward to this meeting. Thank you for putting it together. I replied to the doodle poll (but have limited availability from July 25 to August 11).

I was wondering if you might be including which objectives the Board and/or Board staff are focused on for Phase II in the meeting agenda.

There are a lot of categories referred to in the Phase II material including: (1) Delta outflow objectives, (2) export/inflow objectives, (3) Delta Cross Channel Gate closure objectives, (4) Suisun Marsh objectives; (5) potential new reverse flow objectives for Old and Middle Rivers; (6) potential new floodplain habitat flow objectives; (7) potential changes to the monitoring and special studies program, and (8) other potential changes to the program of implementation.

In addition, reading through the BDCP DEIS and talking with agency staff, it seems that DWR may be requesting that the Emmaton EC standard be modified by moving the compliance point to Three-Mile slough. Similarly, it is not clear whether or not the "Export Limits," usually referred to as the E/I ratio, would be applied only to the south Delta intakes in the event CA builds three to five new intakes as part of BDCP. Do you know if State Board is considering modifying the Emmaton objective and/or export limits objective (to be clear about where it applies) as part of Phase II?

If we could discuss this either in the upcoming meeting or at another time, it would be really helpful to know which objectives will be focused on for modification as part of Phase II.

Thanks again,

Erin
